Dear Charlotte and Bridget (Goodbirds limited)

Confirming New Zealand Mānuka Bioactives Ltd Mānuka is sourced from the remote wild harvest locations in the North Island of New Zealand. This Manuka 25+ Hydrosol contains a very complex number of over 100 natural organic compounds produced *via* steam distillation process. This product contains a small organic portion of high anti-microbial Mānuka β -triketones, along with a myriad of other oxygenated terpenoid related compounds. The Manuka Hydrosol retains some of the active oil component, also many other water soluble components (Natural alcohols & acids) with interesting and potentially therapeutic properties and health benefits.

Manuka oil has been proven to inhibit the growth of bacteria and has natural anti-bacterial properties.
